| <p><b>Attachment 10</b></p> | <p>Primary care Follow up protocol. Designed to assist primary care where there is a lack of guidance in their discharge summary (historical discharges). This does not replace individualised discharge advice. Please note that secondary care recommendations for DEXA for patients on hormone treatment or Sigmoidoscopy post radiotherapy/brachytherapy there are no commissioned pathways currently.</p> | <br><p>Follow up in protocol primary care</p>   |

To help the project team evaluate the process and tools developed for the project please complete the following on line survey after completing a consultation with patients:

<https://www.surveymonkey.com/r/3YJL5ZX>

Please complete once only, survey open until 30/9/15
