

Transforming Cancer Services Team

Commissioning and delivery toolkit for cancer as a long term condition

June 2018

Foreword

Sarita Yaganti, Cancer Strategy Implementation Lead (LWBC), TCST

Purpose: This toolkit aims to provide STP cancer leads a mechanism to develop a business case to support cancer patients as part of long term conditions. We know that people experience effects of treatment years after receiving it. It is for these reasons that for a large proportion of people who get cancer, it will become a long term condition that needs managing

Objective: The objective of the 4 point model is to enable STPs, CCGs and front line primary care staff to support patients with a diagnosis of cancer to self-manage. A holistic CCR at the end of primary treatment will compliment CCRs conducted as part of QOF at the point of diagnosis. Both **CCRs should be holistic, covering psycho-social needs, physical needs, needs of carers and support patients towards self-management.**

Outcome: Cancer Care Reviews are co-produced between the primary care clinician (GP, practice nurse or allied health professional) and the patient and offered at the end of active treatment as well as at the point of diagnosis

Output: STPs and CCGs could develop local initiatives such as the Year of Care model or integrated care frameworks as outline in the Five Year Forward View to include people affected by cancer, particularly for those with cancer and multi-morbidities or social factors and NICE Guidance (NG56)

Introduction

The Transforming Cancer Service Team for London (TCST) developed a model for cancer as a long term condition which was endorsed in 2015 by:

- London Cancer Clinical Leads Advisory Group
- London Cancer Commissioning Board
- Londonwide Local Medical Committee

The TCST is part of the Healthy London Partnership and this work stream has been designed with NHS England's (London) Primary Care Transformation strategy in mind.

In February 2015, a Task & Finish (T&F) Group was established with a membership of patients, primary and secondary health care professionals from the pan London Living with and Beyond Cancer Board to take cancer as a long term condition work stream forward.

The work stream was project managed by the TCST.

01

- Cancer as a Long Term Condition

Cancer as a long term condition

- In the UK, **cancer remains** the leading cause of mortality ([NHSE](#)).
- **1 in 2 people** born after 1960 **will get cancer sometime** in their lifetime ([Cancer Research UK](#)).
- In 2015, **209,500 people in London are living with or beyond cancer** (diagnosed any time since 1995, [PHE](#)).
- In London and West Essex, its expected around **387,000 people living with and beyond cancer by 2030** (this estimate is based on 2010 prevalence, [NCIN](#)).
- Half (**50%**) **of people diagnosed with cancer** in England and Wales **survive their disease for ten years or more** ([CRUK](#)).
- Five-year relative survival for cancer is below the European average in England, Wales and Scotland ([CRUK](#)).
- **70% of people who have cancer, have at least one other long term condition** ([Macmillan](#)).
- **25%** of individuals **had unmet physical and psychological needs** at end of treatment ([TCST](#)).
- **47% of cancer survivors express a fear of their cancer returning** ([TCST](#)).
- 15 months after diagnosis, cancer patients have 60% more A&E attendances, 97% more emergency admissions and 50% more contact with their GPs than a comparable group ([NuffieldTrust](#)).
- The 2016 National Cancer Experience Survey showed that London based CCGs fall considerably short of the best in England (and lag behind England's average) on questions relating to the support patients received from their GP ([NCPES](#)). [Go back to Contents](#)⁶ [Page](#)

NG56 – Guidelines on multi-morbidity

In 2016, NICE produced new guidelines for the management of patients with multi-morbidity.

Focus on:

- reducing treatment burden
- Reducing unplanned care
- Increase quality of life
- Shared decision making
- Important for patients undergoing cancer treatment or living with the consequences and other LTCs.

National Cancer Experience Survey 2016

84% of patients in London were given clear written information about what they should or should not do after discharge

Only **56%** of families or someone close to the patient were given all the information they needed to help care for the patient at home.

93% of patients across London were told who to contact if worried post discharge

National Cancer Patient Experience Survey 2016

NCPES tells us that there is a difference between patient satisfaction of their stay in hospital compared to that of the support provided by primary and community care. Patient satisfaction with support following discharge is even worse. **London continues to fall below the national average**

NCPES 2016 results should only be compared with the results of the 2015 survey, due to major changes to the questions and scoring to the previous surveys.

Q50 Patient definitely given enough support from health or social services *during* treatment

Q51 Patient definitely given enough support from health or social services *after* treatment

QOF CAN003: Patient Review within 6 months of diagnosis

2016/17 - The percentage of patients with cancer, diagnosed within the preceding 15 months, who have a patient review recorded as occurring within 6 months of the date of diagnosis (with exclusions).

CAN003 - Patient Review Within 6 Months of Diagnosis (2016-17) - Standard and Excepted Achievement(%)

02

TCST 4-Point model for holistic Cancer Care Reviews

CCRs in practice

The TCST asked a group of GPs from across London how they conduct CCRs:

- 82% of GPs said that they conduct cancer care reviews in practice.
- 74% use the QOF CCR template
- 14% use the Macmillan CCR template
- 12% didn't know what template they used
- 53% conducted review face to face with the patient
- 41% had a mixture of face to face and telephone consultations
- **6% conducted the cancer care reviews without the patient**
- 60% of the respondents said they receive a **Treatment Summary** from secondary care. 24% didn't and 16% of the GPs didn't know if they received the summary
- 33% felt their consultations catered to their holistic needs
- 37% were not holistic in their nature and 30% were not sure
- CCR appointment lengths varied greatly from 2 – 40 minutes with an average of 10-20 minutes depending on the complexity of the cases

* 55 responses with a large majority from GPs (48 GPs, 1 GP Registrar and 1 Clinical Director). Other responses were from primary care nurses (n=4) and Allied Health Professionals (n=1).

CCRs in practice

A further handful of GPs (15) were opportunistically asked about how they currently conduct CCRs, their understanding of the Review, its purpose and how CCRs can be improved.

- The majority of the feedback outlined that the CCRs are conducted with a GP, face to face or via the telephone. Length of appointment times varied, from a five minute telephone call to twenty minute face to face in the surgery
- Free text questions around the purpose of the cancer care reviews showed that a large majority of the respondents (regardless if they conducted the CCRs) understood that the reviews were to highlight the needs of patients diagnosed with cancer. Interestingly as only 33% felt that their consultations were holistic, this leaves an assumption that the “needs” of the patients were more medical in nature
- Crucially, the survey outlined a need for a standardised and structured template that is not too prescriptive and can be used at a multidisciplinary level

* <https://www.myhealth.london.nhs.uk/system/files/Cancer%20Care%20Review.pdf>

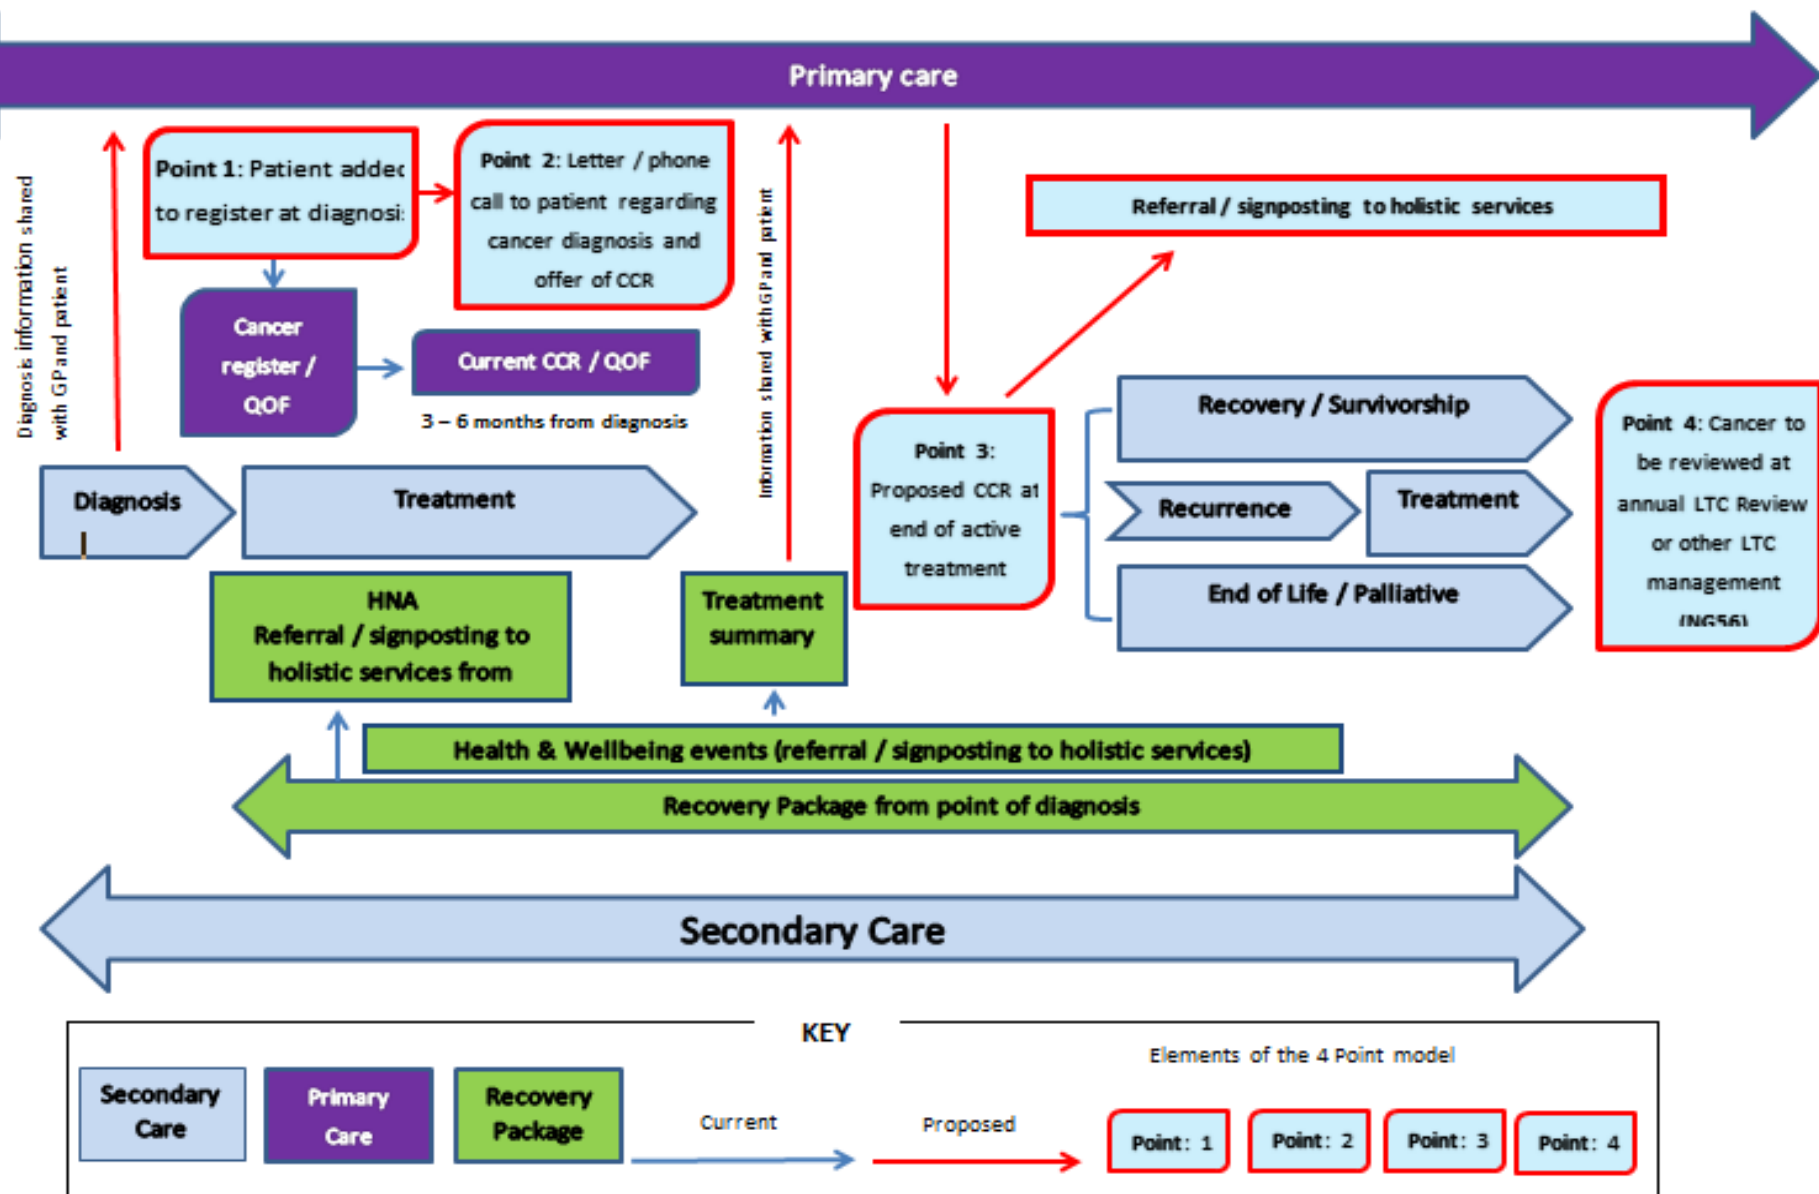

4 –Point model

The aim of the 4 point model is to support people with a diagnosis of cancer to self-manage whilst they have cancer and in the longer term. For some people, they may live with terminal cancer (or they may be in remission) for many years or decades.

Trigger points for the London holistic CCR model are:

- At notification from hospital confirming a new diagnosis (via 2ww, routine outpatient, screening, A&E, other primary care routes, previous diagnosis/recurrence).
- Newly registered patients with cancer diagnosis in last 5 years.
- On receipt of Treatment Summary and /or transfer of care / discharge to community or primary care teams.

4 –Point model

Point 1

Point 1: Patient added to cancer register (QOF CAN001)

- The purpose of a register in QOF is to define a cohort of patients with a particular condition or risk factor. In some cases, this register then informs other indicators in that disease area.
- QOF registers must not be used as the sole input for the purposes of individual patient care and clinical audit i.e. call and recall of patients for check-ups, treatments etc. There are patients for whom a particular treatment or activity is clinically appropriate but they may not meet the criteria as defined by the QOF register and therefore would not be picked up by a search based solely on the QOF register. As such, although QOF registers can be used to supplement clinical audit, they should be supported by appropriate clinical judgement to define which patients should be reviewed, invited for consultation to ensure patients do not miss out on appropriate and sometimes critical care*.

* <http://www.nhsemployers.org/your-workforce/primary-care-contacts/general-medical-services/faqs-and-queries/qof-faqs>

Point 2

Point 2: 1st intervention: First contact after diagnosis (QOF CAN003)

- Telephone call and/or letter to patient regarding recent diagnosis with invitation for the patient to attend the practice for a chat regarding their diagnosis. This could be completed by GP or practice nurse within six months of diagnosis (i.e. QOF CCR).
- Template letter for primary care is sent to patients who have just received a cancer diagnosis (templates are available from the TCST). The letter is to be tailored with the GP name, oncologist name, name of their key worker (if known), treating hospital; the type of cancer diagnosed and includes an outline of the recovery package that they should be receiving along with the Macmillan Top Ten Tips*.
- Information for patient on what to expect as part of a Recovery Package with a prompt to request a key worker and HNA from secondary care if not provided by the time of CCR consultation. Pan London HNA to be included for patient and family/carer for reflection and reviewed at subsequent CCR. Signposting to local support groups should also be included.

* http://www.macmillan.org.uk/_images/what-to-do-after-treatment-guide_tcm9-300403.pdf

Point 3

Point 3: 2nd intervention: Holistic cancer care review at the end of primary treatment as standard (local incentive scheme, sample available from TCST)

- Appointment triggered by a date entered into the Cancer Register and/or receipt of Treatment Summary / transfer to primary care.
- Extended consultation conducted by GP or primary care nurse depending on complexity of patients' needs (e.g. double or triple appointments may be required).
- Use of a clinical template for holistic CCR that captures whether the patient had an HNA in secondary care and their information needs (template available from the TCST). Using Treatment Summaries or discharge letters, discuss consequence of treatment (including late effects) and further advice on physical activity, healthy lifestyles, signs and symptoms to be aware of regarding recurrence carer's needs.
- Healthcare professional to use available screening tools to conduct a psychological assessment
- Collection of minimum data for audit
- Professionals to undertake appropriate training modules in living with and beyond cancer. A bespoke prospectus of training modules will be available from the TCST.
- Patient and professional experience survey
- Primary care MDT meeting to discuss patients on register outlining care planning actions and review any Significant Event Audits (SEAs) related to recurrence or subsequent primary cancer diagnosed via emergency routes. TCST Primary Care Checklist is available for local use *.

* https://www.healthy london.org/sites/default/files/Primary%20Care%20Cancer%20Checklist%20-%20ED%20%26%20LWBC_final_0.pdf

Point 4

Point 4: 3rd intervention: Cancer incorporated and reviewed at an annual LTC Review (QOF generic, long term conditions local incentive scheme, NICE Guidance for Multimorbidity (NG56))

- Annual review may be for a period of time, for example up to five years, or it may be indefinite. It may also only apply to groups patients who have specific needs e.g. multi-morbidities, social risk factors, part of a local integrated care framework.
- The LTC review should include a conversation regarding the person's psycho-social and physical needs re cancer (e.g. preventing recurrence and detecting and/or managing any consequences of treatment), healthy lifestyle advice, as well as any other long term conditions and/or social risk factors that the person may have. Needs of carers should also be taken into account.

Recommendation from pan London Mental Health and Cancer Task & Finish Group, 2017

The following recommendations were received from the Mental Health Task and Finish Group:

“We fully support the practice of holistic wellbeing review in primary care, for people LWBC.

We see the CCRs as a very important conversation, with the potential to achieve multiple objectives: to proactively identify and address issues and needs, strengthen the relationship with primary care providers and guide a patient towards self-management in LWBC. A good conversation, where the patient feels listened to and skilfully guided to use their motivation and experience to self-manage, is the foundation of positive psychological recovery and wellbeing.

To balance thoroughness with patient-centeredness, we would strongly recommend that a CCR start from the patient’s perspective. It may be useful for the professional to state that there are some things they will need to talk about, but main interest is the patient’s concerns, using questions, such as:

- ***‘What’s the most important thing to talk about today, to help you with your recovery?’***
- ***‘What are your top three issues?’***
- ***‘What are your priorities for your wellbeing at the moment?’***

Listening to, exploring and problem-solving these will help re-balance the conversation to the patient’s agenda foremost, and convey a clear message that recovery is patient-led. Of course, additional domains on the CCR (e.g. medication review) can also be pursued subsequently where needed.”

Options appraisal

A full options appraisal available in the [TCST's Business Care for Holistic Cancer Care Reviews](#)

Options are viable in areas where financial incentives are not available.

Payments would be made through QOF and quality assured via Read code/SNOMED audits by the CCG. It would:

- Ensure a standardised approach and reduce variation in the quality of CCRs
- Ensure contact made by primary care with patient is initiated at the most appropriate point, for example once a diagnosis has been confirmed.

Options for full implementation of a holistic CCR at the end of active treatment where funding for an incentive scheme is available would:

- Define cancer as a long term condition within integrated care frameworks (as per NICE Guidance 56)
- Commissions primary care to deliver high quality and holistic Cancer Care Reviews at the time when patients have said they need them most
- Could be achieved as part of a Network / Federation model (under a Networked or Federated schemes)

Cost analysis

Funding source	Description	Cost per patient*
QOF payment	The total value of CAN QOF points for 2016/17 was £165.18. Maximum 11 points for CAN001 and CAN003	£165.18
Holistic CCR after active treatment local incentive scheme	Appointment or 'new patient' appointment (10-15 mins) with primary care nurse	*£33.00
	Appointment or 'new patient' appointment (10-15 mins) with GP	*£45.00

***costs for primary care are shown for illustration purposes**; subject to change depending on local negotiations. Costs based on advice from Surrey and Sussex LMC, the cost for the appointment excludes phlebotomy as a result of suspected reoccurrence which can be claimed under a phlebotomy LCS.

**costs outlined above include any associated admin costs and outlined as costs per patient per year.

Projected costs for implementing the 4-Point model by STP

Cost of a holistic CCR appointment (after active treatment) in Primary care at £45* per appointment

CCG	1-2 yrs prevalence (number of patients)**	5-10 yrs prevalence (number of patients)**	Total cost 1 -2 yr	Total cost 5-10 yrs
NCL STP: Islington, Camden, Haringey, Enfield, Barnet	3031	7785	£136,395	£350,325
NEL STP: Waltham Forest, Tower Hamlets, Newham, City & Hackney	1725	4122	£77,625	£185,490
BHR STP: Barking, Havering, Dagenham and Redbridge	1613	4266	£72,585	£191,970
SEL STP: Greenwich, Lewisham, Lambeth, Southwark, Bromley, Bexley	3975	9856	£178,875	£443,520
SWL STP: Croydon, Merton, Sutton, Richmond, Kingston, Wandsworth, Sutton	3343	9616	£150,435	£432,720
NWL STP: Central London, West London, Brent, Harrow, Hillingdon, Hammersmith & Fulham, Hounslow, Ealing	4589	11254	£206,505	£506,430
West Essex (part of Essex STP)	966	1598	£43,470	£102,870
Total	19242	49185	£865,890	£2,213,325

***costs for primary care are shown for illustration purposes; these may change depending on local negotiations.**

Evaluation framework

Evaluation Objective	Measure	Measurement Tools / data collection
Patient Experience	<p>To assess patient experiences of CCR and assess any quality improvements made by the primary care interventions (offer of support throughout treatment, offer of support to families and carers or signposting to relevant support services).</p> <p>NCPES question: “Patient that reported that their GP and nurses at their general practice supported them through treatment”</p> <p>http://www.ncpes.co.uk/reports/2016-reports</p>	<p>Patient survey after CCR appointment (collected either end of QOF CCR) or at on completion of the Holistic CCR at the end of active treatment.</p> <p>Key NCPES related to support from primary care</p>
Clinical Quality and Safety	<p>Patients added to cancer register (QOF)</p> <p>Number of patients offered CCR at end of active treatment.</p> <p>Significant Event Analysis</p> <p>Safety netting</p>	<p>Cancer Register to capture all patients that received a cancer diagnosis.</p> <p>Read Code audit</p> <p>Any SEAs recorded</p> <p>CCG benchmarking against national cancer registry data</p> <p>CAN001</p>

Evaluation Framework

Evaluation Objective	Measure	Measurement Tools / data collection
Clinician Experience	<p>To test the tools developed for the project that promote holistic follow up of patients.</p> <p>To assess if the education needs of GPs and Practice nurses are addressed through the CCG educational resources/sessions and online resources.</p> <p>To test viability of primary care nurses to carry out holistic reviews as part of long term conditions management.</p> <p>To assess clinicians' experience of the pathway and identify any further development or education needs.</p> <p>Baseline of CCR</p>	<p>Measured through clinician survey. Assessed through the clinician survey, semi structured interviews, training needs assessments and feedback from practice visits.</p>
Activity, Finance and Transferability	<p>Number of patients that received a CCR at point of diagnosis.</p> <p>Number of patients that received a holistic CCR at end of active treatment.</p> <p>Increase National Cancer Experience Survey (NCPES) scores relating to support from primary care.</p>	<p>Measured by the data coming back from the practices via the LCS reporting templates and or QOF data.</p>

Introduction to CCR Templates

- ❖ Several CCGs across London have developed local CCR templates.
- ❖ The following appendices include screenshots of templates in use.
- ❖ Where templates are not included below, the national QOF template and Macmillan template are being used.

Templates:

- TCST Pan London S1 template
- Islington
- Tower Hamlets
- City & Hackney
- Lewisham
- Wandsworth
- Greenwich
- London Cancer
- Macmillan
- Nottingham CCG (proposed national CCR template for S1)

TCST recommended template for SystmOne

This content has been produced by the Transforming Cancer Services Team in consultation with primary care, Macmillan and patients (2015) to support practices in offering a holistic cancer care review particularly around the end of primary treatment

- Discussion and advice on any physical, practical, emotional, spiritual, social or lifestyle concerns raised in the assessment
- Signposting to either local or national support groups
- Information about Health and Wellbeing Clinics, education events or self management courses as available in the local area
- Referral to allied healthcare professionals for support if required
- Advice related to lifestyle e.g. stop smoking services
- Information or referral to an appropriate physical activity programme
- Information or referral for advice on diet and nutrition
- Referral for counselling or psychological support
- Support related to work and finance concerns
- Support for spiritual needs

Cancer review

Cancer Care review should form part of any LTC holistic patient review as there often long term consequences and unmet needs relating to their cancer and the treatments that were given.
QOF- All patients newly diagnosed with cancer need to have a review recorded within 6 months of diagnosis.

☐ Cancer diagnosis discussed

No previous entry

Has the patient received chemo/radiotherapy or both?

No previous entry

☐ Palliative treatment

03-Jan-2013

If the patient is palliative please go to the End of Life page of the 'Integrated Care and AUA Tower Hamlets CEG' template.

As part of the cancer care review, please consider the following:

- **Treatment physical consequences/side effects (can be long term)** such as lymphoedema, fatigue, incontinence, erectile dysfunction, pain, shortness of breath, etc. Referral options below including specialist oncology physio.
- **Psychological impact.** Consider depression/anxiety screen tool. Consider onward referral for support through Compass or Macmillan social prescribing service depending on severity of symptoms. Referral options below.
- **Health and wellbeing:** Use Lifestyle Intervention page. Some treatments increase risk of CVD. Physical activity helps manage side effects e.g. fatigue. Consider referral for physical intervention, smoking cessation and weight loss.
- **Are they a carer? or do they have a carer?** Go to main page of this template to record details.
- **Do they need benefits or financial support?** See links.
- **Prescription payment exemption?** those receiving treatment for cancer, the effects of cancer or the effects of current or previous current treatment are eligible

☐ * Cancer care review (QOF)

14-Dec-2012

London Cancer

The screenshot displays the EMIS Web Health Care System interface. At the top, the title bar reads "EMIS Web Health Care System - Dr Kateb HJ and Partner - 11037". The main menu includes "Summary", "Consultations", "Medication", "Problems", "Investigations", "Care History", "Diary", "Documents", "Referrals", and "New Consultation". Below the menu, there are icons for "Save Template", "Cancel Template", "Spell check", and "Search". The patient information bar shows "MOUSE, Mickey (Mr)" as the active patient, with a preferred name of "Mickey Alias Michael". It also displays the patient's birth date as "21-Jun-1975 (41y)", gender as "Male", EMIS No. as "10609", and usual GP as "KATEB, Hesel (Dr)".

The main content area is titled "Cancer Care Review - London Cancer May 17". On the left, a sidebar lists various pages: "Cancer care review", "Cancer therapy" (highlighted), "Treatment consequences", "Psychological Impact", "Physical Parameters", "Health and Well Being", "Social", "Care Plan", and "Information". The "Cancer therapy" page contains a form with the following fields:

- "Has the patient received chemo/radiotherapy or both?" with a dropdown menu.
- "Treatment summary has been received? tick if yes" with a checkbox.
- A "Text" field.

On the right side of the form, there are two dates and corresponding links: "21-Mar-2017 Cancer chem..." and "04-Aug-2015".

At the bottom of the interface, the NHS logo is visible, along with the text "Higher Level GP (SJR002) | BHUIYA, Afsana (Dr) | Organisation: Dr Kateb HJ and Partner | Location: Dr Katebs practice". The system clock shows "11:11 03/05/2017".

London Cancer

The screenshot displays the EMIS Web Health Care System interface. At the top, the patient's name 'MOUSE, Mickey (Mr)' is shown, along with the system name 'EMIS Web Health Care System - Dr Kateb HJ and Partner - 11037'. Below this, a navigation bar includes tabs for Summary, Consultations, Medication, Problems, Investigations, Care History, Diary, Documents, Referrals, and New Consultation. A toolbar on the left contains icons for Save Template, Cancel Template, Spell check, and Search. A status bar at the top indicates 'Tasks - 3 (1) Registration - 220 (4) Documents - 2 Referrals - 1 Test Requests - 203 SCR - 4 Report Management - 2'.

The main patient information section shows 'MOUSE, Mickey (Mr)' as the active patient, with a preferred name of 'Mickey Alias Michael'. It also lists birth date '21-Jun-1975 (41y)', gender 'Male', EMIS No. '10609', and usual GP 'KATEB, Hessel (Dr)'.

The 'Cancer Care Review - London Cancer May 17' section is active, showing a list of pages on the left: Cancer care review, Cancer therapy, Treatment consequences (highlighted), Psychological Impact, Physical Parameters, Health and Well Being, Social, Care Plan, and Information. The bottom of the screen shows a taskbar with various application icons and a system tray displaying the time '11:11' and date '03/05/2017'. A small pop-up window in the bottom right corner shows 'MOUSE, Mickey (Mr)' with two yellow warning icons and text: 'Eligible for IPS Employment Trial' and 'LTC LCS Eligible for Spirometry Sc...'.

London Cancer

The screenshot displays the EMIS Web Health Care System interface for a patient named Mickey Michael. The top navigation bar includes tabs for Summary, Consultations, Medication, Problems, Investigations, Care History, Diary, Documents, Referrals, and New Consultation. The patient's details are shown as: **MOUSE, Mickey (Mr)**, Born **21-Jun-1975 (41y)**, Gender **Male**, EMIS No. **10609**, Usual GP **KATEB, Hesel (Dr)**. The main section is titled **Cancer Care Review - London Cancer May 17**. On the left, a sidebar lists various review categories: Cancer care review, Cancer therapy, Treatment consequences, **Psychological Impact** (highlighted), Physical Parameters, Health and Well Being, Social, Care Plan, and Information. The **Psychological Impact** section contains three items: ☐ Depression screening, ☐ Anxiety screening, and ☐ Refer to psychologist. Each item has a text input field and a date field. The dates are 04-Aug-2015 for the first two and 'No previous entry' for the third. A bottom status bar shows the user is logged in as 'MOUSE, Mickey (Mr)' and lists two alerts: 'Eligible for IPS Employment Trial' and 'LTC LCS Eligible for Spirometry Sc...'. The bottom of the screen shows the Windows taskbar with various application icons and the system clock indicating 11:12 on 03/05/2017.

London Cancer

The screenshot displays the EMIS Web Health Care System interface. At the top, the patient's name 'MOUSE, Mickey (Mr)' and the system name 'EMIS Web Health Care System - Dr Kateb HJ and Partner - 11037' are visible. The main menu includes 'Summary', 'Consultations', 'Medication', 'Problems', 'Investigations', 'Care History', 'Diary', 'Documents', and 'Referrals'. A toolbar on the left contains icons for 'Save Template', 'Cancel Template', 'Spell check', and 'Search'. Below this, a status bar shows 'Tasks - 3 (1)', 'Registration - 220 (4)', 'Documents - 2', 'Referrals - 1', 'Test Requests - 203', 'SCR - 4', and 'Report Management - 2'. The patient's details are listed as 'MOUSE, Mickey (Mr)', 'Born 21-Jun-1975 (41y)', 'Gender Male', 'EMIS No. 10609', and 'Usual GP KATEB, Hesel (Dr)'. The 'Cancer Care Review - London Cancer May 17' section is active, showing a list of pages on the left: 'Cancer care review', 'Cancer therapy', 'Treatment consequences', 'Psychological Impact', 'Physical Parameters', 'Health and Well Being' (selected), 'Social', 'Care Plan', and 'Information'. The 'Health and Well Being' section contains a table with columns for 'Text', 'Date', and 'Action'. The table lists various health and well-being items, including 'Lifestyle advice given', 'Lifestyle advice regarding exercise given', 'Lifestyle advice regarding diet given', 'Exercise on prescription?', 'Alcohol consumption', 'Patient advised about alcohol', 'Smoking status?', and 'Smoking advice'. The table shows dates and actions for these items, such as '04-Aug-2015' and 'Referral for ...'. A 'Summary' button is visible on the right side of the table. At the bottom, a 'Latest Contacts' section is partially visible. The system's footer shows 'NHS', 'Higher Level GP (SJR002)', 'BHUIYA, Afsana (Dr)', 'Organisation: Dr Kateb HJ and Partner', 'Location: Dr Katebs practice', and the date '11:12 03/05/2017'.

London Cancer

The screenshot displays the EMIS Web Health Care System interface. The top navigation bar includes tabs for Summary, Consultations, Medication, Problems, Investigations, Care History, Diary, Documents, Referrals, and New Consultation. The patient record is for **MOUSE, Mickey (Mr)**, born 21-Jun-1975 (41y), Male, with EMIS No. 10609 and Usual GP KATEB, Hesel (Dr). The main section is titled **Cancer Care Review - London Cancer May 17**. On the left, a sidebar lists pages: Cancer care review, Cancer therapy, Treatment consequences, Psychological Impact, Physical Parameters, Health and Well Being, **Social** (highlighted), Care Plan, and Information. The **Social** page contains a list of items with checkboxes and text input fields:

Item	Text	Date	Action
<input type="checkbox"/> Benefits counselling		19-May-2016	»
<input type="checkbox"/> DS1500 Disability living allowance report discussed		19-May-2016	»
<input type="checkbox"/> Discuss if fit for work and document housing concerns		19-May-2016	»
<input type="checkbox"/> Advice/signposted on how to get further help.		04-Aug-2015	»
<input type="checkbox"/> Referral to Social Services		04-Aug-2015	»

At the bottom right, a tooltip for **MOUSE, Mickey (Mr)** shows two yellow warning icons: "Eligible for IPS Employment Trial" and "LTC LCS Eligible for Spirometry Sc...". The bottom status bar shows the user is a Higher Level GP (SJR002) at Dr Kateb HJ and Partner, with the location being Dr Katebs practice. The system clock shows 11:12 on 03/05/2017.

London Cancer

The screenshot displays the EMIS Web Health Care System interface. At the top, the patient's name is "MOUSE, Mickey (Mr)" and the system is identified as "EMIS Web Health Care System - Dr Kateb HJ and Partner - 11037". The main menu includes "Summary", "Consultations", "Medication", "Problems", "Investigations", "Care History", "Diary", "Documents", and "Referrals". A toolbar on the left contains icons for "Save Template", "Cancel Template", "Spell check", and "Search". Below this, a status bar shows "Tasks - 3 (1)", "Registration - 220 (4)", "Documents - 2", "Referrals - 1", "Test Requests - 203", "SCR - 4", and "Report Management - 2".

The patient record for "MOUSE, Mickey (Mr)" is shown, with details: "Born 21-Jun-1975 (41y)", "Gender Male", "EMIS No. 10609", and "Usual GP KATEB, Hesel (Dr)". The "Cancer Care Review - London Cancer May 17" section is active, displaying a "CARE PLAN" with a summary of actions and two entries: "Cancer care plan discussed with patient" dated 21-Mar-2017 and "Cancer care plan given (please print off the consultation for the patient so they have their own record)" dated 04-Aug-2015. A sidebar on the left lists various pages like "Cancer care review", "Cancer therapy", "Treatment consequences", "Psychological Impact", "Physical Parameters", "Health and Well Being", "Social", "Care Plan", and "Information".

At the bottom, a notification box for "MOUSE, Mickey (Mr)" indicates eligibility for an "IPS Employment Trial" and "LTC LCS Eligible for Spirometry Sc...". The system footer shows "NHS Higher Level GP (SJR002)", "BHUIYA, Afsana (Dr)", "Organisation: Dr Kateb HJ and Partner", and "Location: Dr Katebs practice". The taskbar at the very bottom includes icons for various applications and the system clock showing "11:13 03/05/2017".

London Cancer

The screenshot displays the EMIS Web Health Care System interface. At the top, the title bar reads "EMIS Web Health Care System - Dr Kateb HJ and Partner - 11037". The main menu includes "Summary", "Consultations", "Medication", "Problems", "Investigations", "Care History", "Diary", "Documents", and "Referrals". A sub-menu "New Consultation" is also visible. Below the menu, there are icons for "Save Template", "Cancel Template", "Spell check", and "Search". The patient record for "MOUSE, Mickey (Mr)" is shown, with details: "Born 21-Jun-1975 (41y)", "Gender Male", "EMIS No. 10609", and "Usual GP KATEB, Hesel (Dr)". The "Cancer Care Review - London Cancer May 17" section is active, displaying a list of pages on the left: "Cancer care review", "Cancer therapy", "Treatment consequences", "Psychological Impact", "Physical Parameters", "Health and Well Being", "Social", "Care Plan", and "Information". The "Information" page is selected, showing links for "Entitlement to medical exemption from prescription charges", "Macmillan website for further support and information", and "London cancer directory". A "Latest Contacts" section is at the bottom left. The bottom status bar shows "NHS Higher Level GP (SJR002)", "BHUIYA, Afsana (Dr)", "Organisation: Dr Kateb HJ and Partner", and "Location: Dr Katebs practice". A taskbar at the very bottom shows various application icons and the system clock "11:13 03/05/2017".
